

DLRSD train-only proxies | RemoteCLIP ViT-L-14 | TSNE
340 original attributes + 544 proxy vectors

- Original attributes
- Proxy classes
- Train attribute prototypes
- Comparison class names

One joint t-SNE fit, shared across all seven panels.
Perplexity 30; seed 42.
Only local neighborhoods are interpretable.

Comparison classes include shared names and synonyms;
they are not all strictly unseen classes.
No comparison vocabulary was used to build proxies.
