

iSAID train-only proxies | RemoteCLIP ViT-L-14 | PCA
300 original attributes + 420 proxy vectors

- Original attributes
- Proxy classes
- Train attribute prototypes
- Comparison class names

PCA fit on train attributes + proxies + prototypes;
comparison names projected into the same basis.
Explained variance: 13.9%, 10.3%

Comparison classes include shared names and synonyms;
they are not all strictly unseen classes.
No comparison vocabulary was used to build proxies.
